The only window decoration approp-
riate of Washington's birthday was
the one in the B. B. company's store.
The decoration consisted of a large
and beautiful picture of Washington
over which hovered with outspread
wings a military eagle holding in its
beak an evergreen wreath. Encircled
around the picture were a number of
beautiful potted plants. These, with
the addition of several flags, made a
most appropriate and patriotic decora-
tion. L. F. Fournier, the decorative
artist of the B. B. company, has been
confined to his room for several days
by grip, and the above mentioned de-
coration was the first effort upon re-
covering his strength sufficiently to be
at the store. The B. B. windows are
becoming famous under his artistic
hand.

was a most successful one.

The Iron King base ball team has
reorganized for the season of 1901.
R. J. Wilder was elected business man-
ager. Several of the players who helped
to win the many barrels which crowned
the efforts of the team last season
have left camp. However some of the
old material is still with the team
and some promising new material, so
that with the hard practice that the
team is about to commence, the man-
agement hopes that the season of 1901
may be as successful as that of 1903.

Perhaps the most interesting ad-
dress ever delivered in our camp was
that of the St. Louis detective depart-
ment during the World's Fair, White-

the secret service department.

The scaffolding was removed from

new grandeur. The four miles of
the building are finished and the in-

A course of macadam has been
spread on the bottom of the two miles
of lagoons at the World's Fair grounds.
Most of the bridges spanning the wa-
terways have been finished and all is
ready for the reception of the millions
of water. The pumping apparatus will
be given a test soon.

The interior painting of the big U.

club was formed by a number of those

organizer and W. J. Shaw secretary of

A number of the boys in camp have
organized a baseball team to be known
as the Junior Iron King base ball
team. Roy Rogers is captain. The
boys will undoubtedly give a good ac-
count of themselves with teams of
their class.

John Weaver, leader of the Iron King
Extension has secured the position of
chief blacksmith in the smelter repair
shop at Cananeros, Mexico.

Geo. Lynch and J. P. Ryan have re-
ceived an attractive offer to go to
Australia to introduce the Leyzer
drill machine into the mines of that
country. In all probability they will
accept the offer.

A little party came into the home
of Mr. and Mrs. Adam Krakenberger
last week. Both mother and daughter

of the Iron King laundry, formerly
under the control of the Chinaman.

that the laundry has passed into white
hands.

The marked value of stocks in cer-
tain vast combinations of corporations
known as trusts have sunk to one half,
one quarter, one tenth, and in some
cases to one fiftieth of the market
price a year ago. Those who are won-
dering how on earth we shall get rid
of trusts may as well save their an-
xious breath and economize their per-
piration. Trusts seem to have a way
of getting rid of themselves.

The democrats seem to have started
a movement to abolish the Geological
survey, on the ground that it has
spent twenty million dollars and has
nothing to show for it. The reason
for this effort to destroy one of our
most important scientific bureaus is,
of course, that very few democrats
know anything whatever about geol-
ogy.
